**BAYERN LIMITED**

**COMPANY  
PROFILE**

## ABOUT US

BAYERN LIMITED, a wholly indigenous company incorporated in 2004 under the “Companies and Allied Matters Act” with RC 504358.

We commenced operations as a heavy duty equipment rental, sales and maintenance company before expanding operations to engineering, procurement and construction with professionals of proven track record of performance and integrity, with experience spanning several decades in the oil and energy industry.

We are a highly committed, streamlined and structured organisation with a very skilled and experienced workforce in different fields; combining cutting edge innovative technology to deliver quality and cost effective solutions to our clients and joint venture partners taking into consideration the time sensitive nature of operations in the industry within which we play.

## STRATEGIC OBJECTIVES

- To develop our employees into the most professional and fully committed team in the industry.
- To develop & exploit our local capability and to remain a big player in the oil and energy industry.
- To continue to expand our capability to service other markets with a full range of services.
- To continue growing our core services to maintain our position as the leader in providing services covering the life cycle of the Oil & energy sector development.

## VISION

Our vision is aimed towards contributing our quota to actualising the strategic objective of the federal government of Nigeria at ensuring that Nigeria’s oil and energy industry is controlled majorly by Nigerians and this we have set about achieving by providing local and international training for our personnel. We are also working with committed foreign technical partners to ensure technology transfer to Nigerians.

# POLICY STATEMENT

BAYERN LIMITED is committed to the provision of product and services that, in addition to meeting clients' needs and expectations will satisfy all applicable statutory and regulatory requirements. Implementation of a quality management system based on international standard and dedication to continual improvement. The fundamental requirement of this system calls for a systematic and disciplined approach by all employees in accordance with formalized processes and documented procedures. The management will review the quality system at planned intervals and provide the resources necessary to ensure its continuing suitability. This central objective will be achieved through the development and
